

VIOLENCE AT HOME

The FACT Report Appendix

June 2010

COMMISSIONED BY THE
FAMILY AND CHILDREN'S
TRUST FUND OF VIRGINIA

TABLE OF CONTENTS

Appendix: Data and Sources, Indicators by Locality and Region

Percentage of the Population Living below the Poverty LineA-1

Percentage of Labor Force that Is UnemployedA-7

Arrests for Drug- and Alcohol-related OffensesA-15

CPS Founded Investigations of Abuse and Neglect of Children by Family MemberA-19

APS Substantiated Reports of Abuse and Neglect of Elders and Incapacitated AdultsA-25

Child Homicides Perpetrated by a Family Member or CaregiverA-31

Adult Homicides Perpetrated by a Family MemberA-37

Elder Homicides Perpetrated by a Family Member or CaregiverA-43

Arrests of Juveniles for Violent Sexual Offenses Committed against a Family MemberA-49

Arrests of Adults for Violent Sexual Offenses Committed against a Family MemberA-55

Arrests of Juveniles for Non-sexual Violent Offenses against a Family MemberA-61

Arrests of Adults for Non-sexual Violent Offenses against a Family MemberA-67

Emergency Protective Orders Issued against a Family MemberA-75

Arrests for Violation of a Protective OrderA-79

Domestic Violence Shelter LocationsA-85

Domestic Violence Shelter Bed-nights Provided to IndividualsA-87

Individuals Denied Shelter from Domestic Violence Due to Lack of SpaceA-87

Number of Homeless Adults Who Report Having Experienced Domestic ViolenceA-91

Note: For each year, localities are ranked in order of incidence, with a number one (1) reflecting the lowest incidence, and a number 134 reflecting the highest incidence. Localities with equal incidences are given equal rank. Indicators with extremely low incidence across localities were not ranked.

Percentage of the Population Living below the Poverty Line

Source: These data were obtained from the Small Area Income and Poverty Estimates (SAIPE), U.S. Census Bureau. Poverty data were retrieved from <http://www.census.gov/did/www/saipe/data/statecounty/data/index.html> in January 2010.

Definition: This indicator reflects the percentage of the total population living below the poverty line for each locality and the Commonwealth of Virginia in each calendar year.

Data Detail: These data reflect poverty rates from model-based SAIPE calculations, which use statistical regression models to predict the number of people in poverty for each locality, in each calendar year, based on U.S. Census and administrative data. The poverty rate is calculated by dividing the SAIPE estimated number of individuals living below the federal poverty threshold by the total population for each locality and multiplying the result by 100.

Limitations: Complete information on limitations of the estimates is available on the SAIPE website, at <http://www.census.gov/did/www/saipe/methods/cautions.html>.

For more information, visit <http://www.census.gov/did/www/saipe/index.html>. For further methodological details, visit <http://www.census.gov/did/www/saipe/methods/statecounty/index.html>.

Percentage of the Population Living Below the Poverty Line

Percentage of Labor Force that Is Unemployed

Source: These data were obtained from the Bureau of Labor Statistics, Local Area Unemployment Statistics (LAUS). County and state annual unemployment rates were retrieved from <http://www.bls.gov/Lau/> in January 2010.

Definition: This indicator reflects the average annual percentage of the total workforce unemployed and seeking employment for each locality in each calendar year.

Data Detail: These data reflect unemployment rates from LAUS calculations. The unemployment rate is calculated by dividing the number of individuals who are unemployed and actively seeking employment by the total size of the labor force and multiplying the result by 100. This report contains data for calendar years 2004 to 2008.

The Bureau of Labor Statistics estimates unemployment for localities using employment estimates from the Current Employment Statistics and unemployment insurance claimant counts. Local Area Unemployment estimates are used by the federal government to allocate funding.

Limitations: Although all data are conceptually comparable geographically, estimates are better for larger areas, such as states. Users should note that estimates generated by LAUS and by the U.S. Decennial Census differ; details are available at <http://www.bls.gov/lau/censusdiff.htm>.

For more information, visit <http://www.bls.gov/Lau/>. For further methodological details, visit <http://www.bls.gov/lau/laumthd.htm>.

Percentage of Labor Force that Is Unemployed

Arrests for Drug- and Alcohol-related Offenses

Source: These data were provided by the Incident Based Crime Reporting Repository System, Virginia State Police and obtained by special request to the Department of Criminal Justice Services. Data were processed by Debbie Roberts of the Virginia Department of Criminal Justice Services, Criminal Justice Research Center.

Definition: This indicator reflects the combined number of arrests made by law enforcement officials for drug- and alcohol-related offenses in a locality, per calendar year, as a rate within the population aged 18 and older.

Data Detail: These data reflect the combined number of arrests made for offenses involving alcohol or drugs, including driving under the influence, drunkenness, liquor law violations, drug/narcotic violations, and drug equipment violations reported by city, county, and town law enforcement agencies for each locality. All locality arrest counts include arrests reported by towns within the county, but do not include arrests made by other reporting agencies, such as college, university, airport, or capitol police.

The drug- and alcohol-related arrest rate (per 1,000) was calculated for each locality by dividing the number of adult arrests in a locality by the total population of persons aged 18 or older in that locality and multiplying the result by 1,000. This report contains data for calendar years 2004 to 2008.

Limitations: Some localities have occasionally had problems reporting complete crime and/or arrest data to the Incident Based Crime Reporting Repository System. Localities with past reporting problems—including technical difficulties and lack of resources among local agencies—are as follows:

2004: Arlington County, Caroline County, Floyd County, Greensville County, Halifax County, King George County, Powhatan County, Shenandoah County, Spotsylvania County, Alexandria

City, Buena Vista City, Emporia City, Fairfax City, Salem City, Staunton City, Williamsburg City

2005: Alleghany County, James City County, Roanoke County, Fairfax City, Manassas Park City, Staunton City

2006: Augusta County, Prince Edward County, Roanoke County, Southampton County, Stafford County, Buena Vista City, Falls Church City, Norfolk City, Petersburg City, Richmond City

2007: Augusta County, Lunenburg County, Prince Edward County, Shenandoah County, Southampton County, Norfolk City

2008: Goochland County, Lunenburg County, Madison County, Middlesex County, Fairfax City

The Incident Based Crime Reporting Repository System assigns only the single most severe offense code to each arrest. For example, if a person arrested for sexual assault were under the influence of alcohol or drugs at the time of the offense, the Incident Based Crime Reporting Repository System would not record the arrest as an alcohol- or drug-related arrest. Therefore, the arrest data presented in this report underestimate the actual incidence of arrests that may be drug- and/or alcohol-related. Arrest rates may also vary by locality due to differences in enforcement practices; for example, one locality's campaign to limit driving while under the influence will increase its arrest rate relative to a locality without special focus on limiting driving under the influence, even if actual incidence rates of individual driving while intoxicated are similar.

Arrests for Drug- and Alcohol-related Offenses

Child Protective Services Founded Investigations of Abuse and Neglect of Children by Family Member

Source: These data were provided by the Virginia Department of Social Services Office of Outcome Based Reporting and Analysis and obtained by special request to Matt Wade, Manager, in fall 2009. Data were processed by Rebecca Hjelm, Policy Analyst.

Definition: This indicator reflects the number of founded investigations of abuse or neglect of children, aged 0 to 17, by Child Protective Services (CPS), in a locality, per state fiscal year.

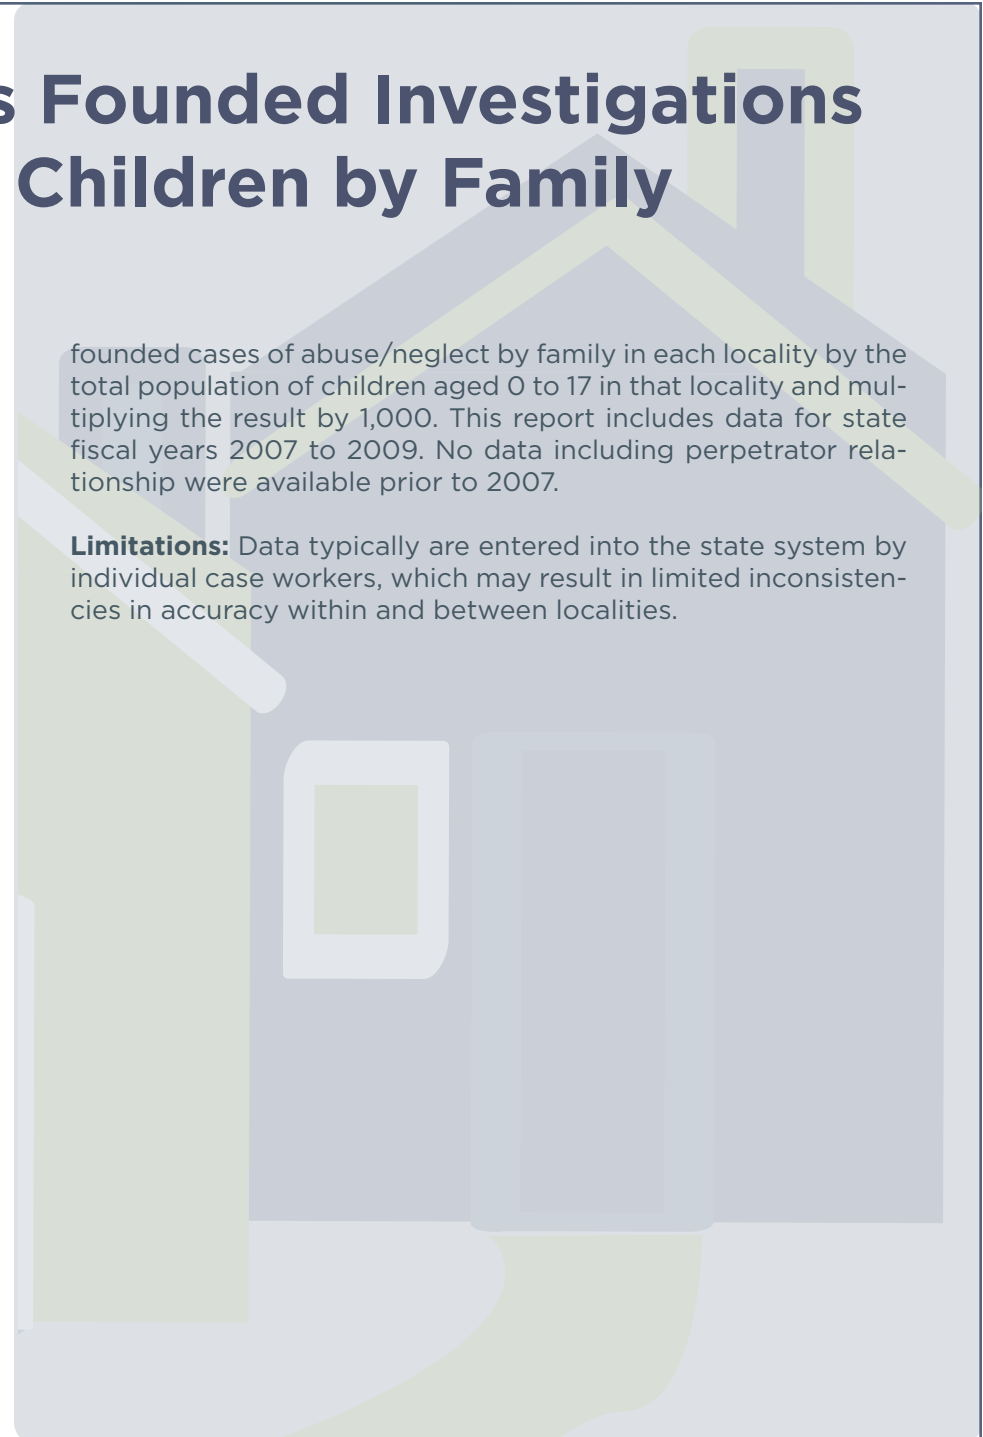

Data Detail: Upon validating a report of child abuse or neglect for an investigation response, a local department of social services determines whether the investigation is founded based on a preponderance of evidence showing that maltreatment has occurred. Types of child abuse and neglect for which an investigation may be founded include physical abuse, physical neglect, sexual abuse, mental abuse/neglect, and medical neglect.

A large number of valid reports of child abuse and neglect receive a family assessment response rather than an investigation; assessments are not included in these data. Family assessments are the preferred response when a child is not in immediate danger and include developing plans to remedy and/or prevent risk of future abuse. Investigations are conducted when there are immediate concerns about child safety, a prior history of child abuse, and/or the reported allegation is severe. This indicator reflects the number of founded investigations for any type of child abuse/neglect, not the number of children abused/neglected; children may be counted more than once if they experience more than one type of abuse/neglect.

This indicator's rate (per 1,000) was calculated for each locality and the Commonwealth of Virginia by dividing the number of

founded cases of abuse/neglect by family in each locality by the total population of children aged 0 to 17 in that locality and multiplying the result by 1,000. This report includes data for state fiscal years 2007 to 2009. No data including perpetrator relationship were available prior to 2007.

Limitations: Data typically are entered into the state system by individual case workers, which may result in limited inconsistencies in accuracy within and between localities.

Adult Protective Services Substantiated Reports of Abuse and Neglect of Elders and Incapacitated Adults

Source: These data were provided by the Virginia Department of Social Services Office of Outcome Based Reporting and Analysis and obtained by special request to Matt Wade, Manager, in fall 2009. Data were processed by Rebecca Hjelm, Policy Analyst.

Definition: This indicator reflects the number of substantiated investigations of abuse, neglect, or exploitation of elders and incapacitated adults aged 18 and older by Adult Protective Services (APS), in a locality, per state fiscal year.

Data Detail: Upon receiving a report of adult abuse, neglect, or exploitation, a local department of social services determines whether the report is valid. Valid APS reports are investigated and at the end of the investigation the case worker makes a disposition of “needs protective services and accepts,” “needs protective services and refuses,” “need for protective services no longer exists,” “unfounded,” or “invalid.” A substantiated report is defined as a completed investigation with a disposition that the adult needs protective services. Forms of abuse include self-neglect, neglect, financial exploitation, physical abuse, mental abuse, sexual abuse, and other exploitation. This indicator reflects the number of cases of any type of elder or incapacitated adult abuse or neglect, not the number of individuals experiencing abuse or neglect; individuals may be counted more than once if they experience more than one type of abuse or neglect. Self-neglect constitutes approximately 55 percent of all APS substantiated cases, and abuse directly at the hands of others constitutes approximately 45 percent of all APS substantiated cases.

This indicator’s rate (per 1,000) was calculated for each locality and the Commonwealth of Virginia by dividing the number of

substantiated cases of abuse, neglect, or exploitation in each locality by the total population of adults aged 18 and older in that locality and multiplying the result by 1,000. This report includes data for state fiscal years 2007 to 2009. Changes to the APS reporting and data management system prior to state fiscal year 2007 make earlier data unreliable.

Limitations: Population estimates for the number of incapacitated adults are not available, so this indicator was calculated as a rate within the general adult population for each locality. Therefore, this indicator underestimates the incidence of abuse or neglect within the population of elders and incapacitated adults. Data typically are entered into the state system by individual case workers, which may result in limited inconsistencies in accuracy within and between localities.

Child Homicides Perpetrated by a Family Member or Caregiver

Source: These data were provided by the Office of the Chief Medical Examiner, Family and Intimate Partner Homicide Surveillance Program, Virginia Department of Health. These data were obtained by special request in September 2009 and February 2010 to Nicole Lee, Ph.D., the Family and Intimate Partner Surveillance Coordinator.

Definition: This indicator reflects the number of children, ages 0–17, in each calendar year whose deaths were determined to be a result of a homicide committed by a current or past family member or caregiver, or whose deaths were precipitated by acts of family violence, regardless of whether the violence was directed at the deceased.

Data Detail: The Family and Intimate Partner Homicide Surveillance Coordinator of the Office of the Chief Medical Examiner of Virginia determines whether a death is the result of a homicide based on a medicolegal death investigation: a review of medical records, police reports, newspaper reports, and court documents (the determination of a homicide is not necessarily based on court outcomes) associated with each death. Homicide, as determined by the Office of the Chief Medical Examiner, differs from the legal definition of murder: any instance of death caused by another person is considered homicide. For this indicator, the Family and Intimate Partner Surveillance Coordinator compiled a list of all child homicides (victims aged 0–17) in Virginia, as identified through newspaper reports, and evaluated each case for inclusion based on the relationship between the deceased and the alleged offender.

Family relationships encompassed in this indicator include parents or legal guardians, the parent's/legal guardian's current or past significant others—including spouse (married or separated), former spouse, current or former boyfriend, girlfriend, or same-sex partner—other family by blood or marriage (e.g., siblings, grandparents, stepparents, cousins, etc.), and child care-

givers (i.e., anyone responsible for the care or supervision of the child). Intimate partner associated homicides occur when a victim—which may include law enforcement, friends, neighbors, relatives, or bystanders—is killed as a result of familial or intimate partner violence; intimate partner associated homicides of children are included in this indicator. Out-of-state deaths resulting from fatal injuries inflicted in Virginia are also included.

The homicide rate (per 100,000) for children aged 0–17 was calculated for each locality by dividing the number of child homicides by a family member or caregiver in a locality by the total population of children aged 0–17 in that locality and multiplying the result by 100,000. This report contains data for calendar years 2003 to 2008, presented as three-year rolling averages for 2005–2008 in order to address particularly high annual variation in familial child homicide rates. Data is not ranked due to fluctuations in rates.

Data for 2008 are preliminary.

Limitations: The number of child homicides by a family member in a given year and locality is consistently small, which results in data which is highly variable year to year. Annual rates based on a small number of cases ($n < 20$) should be interpreted with caution.

These data were derived from a medicolegal death investigation rather than from a legal process. Therefore, these data include murder, manslaughter, and cases that may not have resulted in a legal finding of guilt for the alleged offender. Due to this definition, the homicide data provided in this report may differ from homicide data from the State Police and the Virginia court system.

Child Homicides Perpetrated by a Family Member or Caregiver

Adult Homicides Perpetrated by a Family Member

Source: These data were provided by the Office of the Chief Medical Examiner, Family and Intimate Partner Homicide Surveillance Program, Virginia Department of Health and obtained by special request in September 2009 and February 2010 to Nicole Lee, Ph.D., the Family and Intimate Partner Surveillance Coordinator.

Definition: This indicator reflects the number of adults, aged 18 to 64, whose deaths were determined to be caused by a current or past family member, or whose deaths were precipitated by acts of family violence, regardless of whether the violence was directed at the deceased, in a locality, per calendar year, as a rate within the population aged 18 to 64.

Data Detail: The Family and Intimate Partner Homicide Surveillance Coordinator of the Office of the Chief Medical Examiner of determines whether a death is the result of a homicide based on a medicolegal death investigation: a review of medical records, police reports, newspaper reports, and court documents (the determination of a homicide is not necessarily based on court outcomes) associated with each death. Homicide, as determined by the Office of the Chief Medical Examiner, differs from the legal definition of murder: any instance of death caused by another is considered homicide. For this indicator, the Family and Intimate Partner Surveillance Coordinator compiled a list of all adult homicides in Virginia, as identified through newspaper reports, and evaluated each case for inclusion based on the relationship between the deceased and the alleged offender.

Family relationships encompassed in this indicator include current or past significant others—including spouse (married or separated), former spouse, current or former boyfriend, girlfriend, or same-sex partner—and other family by blood or marriage (e.g., siblings, parents, grandparents, stepparents, cousins, in-laws, etc.). Intimate partner associated homicides occur when a victim—which may include law enforcement,

friends, neighbors, relatives, or bystanders—is killed as a result of familial or intimate partner violence; intimate partner associated homicides of adults aged 18 to 64 are included in this indicator. Out-of-state deaths resulting from fatal injuries inflicted in Virginia are also included.

The homicide rate (per 100,000) for adults was calculated for each locality by dividing the number of adult homicides by a family member in a locality by the total population of adults in that locality and multiplying the result by 100,000. This report contains data for calendar years 2003 to 2008, presented as three-year rolling averages for 2005 to 2008 in order to address particularly high annual variation in familial adult homicide rates. Data is not ranked due to fluctuations in rates.

Data for 2008 are preliminary.

Limitations: The number of adult homicides by a family member in a given year and locality is consistently small, which results in data which is highly variable year to year. Annual rates based on a small number of cases ($n < 20$) should be interpreted with caution.

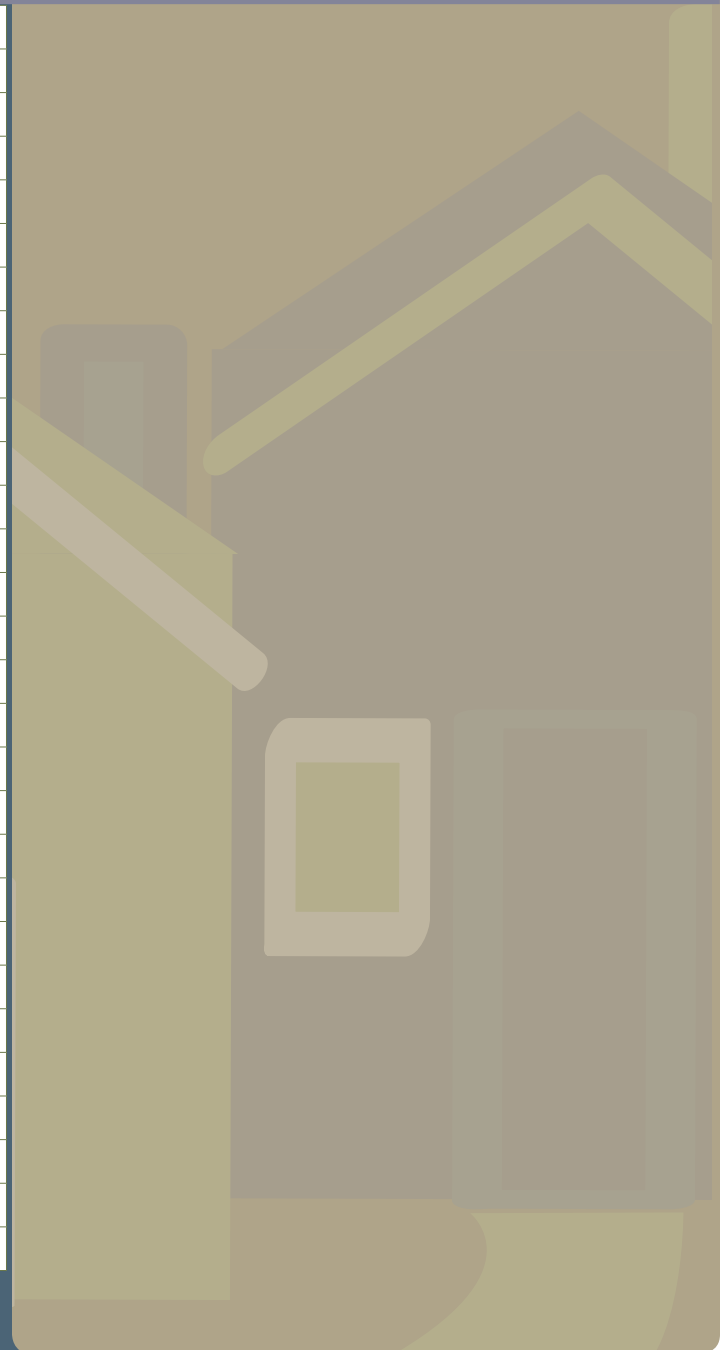

These data were derived from a medicolegal death investigation rather than from a legal process. Therefore, these data include murder, manslaughter, and cases that may not have resulted in a legal finding of guilt for the alleged perpetrator. Due to this definition, the homicide data provided in this report may differ from homicide data from the State Police and the Virginia court system.

Adult Homicides Perpetrated by a Family Member

Elder Homicides Perpetrated by a Family Member or Caregiver

Source: These data were provided by the Office of the Chief Medical Examiner, Family and Intimate Partner Violence Surveillance Program, Virginia Department of Health. These data were obtained by special request in September 2009 and February 2010 to Nicole Lee, Ph.D., the Family and Intimate Partner Surveillance Coordinator.

Definition: This indicator reflects the number of elders, aged 65 and older, in each calendar year whose deaths were determined to be the result of a current or past family member or caregiver, or whose deaths were precipitated by acts of family violence, regardless of whether the violence was directed at the deceased.

Data Detail: The Family and Intimate Partner Homicide Surveillance Coordinator of the Office of the Chief Medical Examiner of determines whether a death is the result of a homicide based on a medicolegal death investigation: a review of medical records, police reports, newspaper reports, and court documents (the determination of a homicide is not necessarily based on court outcomes) associated with each death. Homicide, as determined by the Office of the Chief Medical Examiner, differs from the legal definition of murder: any instance of death caused by another is considered homicide, whether or not the act was intentional. For this indicator, the Family and Intimate Partner Surveillance Coordinator compiled a list of all adult homicides in Virginia, as identified through newspaper reports, and evaluated each case for inclusion based on the relationship between the deceased and the alleged offender.

Family relationships encompassed in this indicator include current or past significant other relationships—including spouse (married or separated), former spouse, current or former boyfriend, girlfriend, or same-sex partner—other family by blood or marriage (e.g., siblings, parents, stepparents, children, cousins, in-laws, etc.), and elder caregivers (i.e., anyone responsible for

the care of the elder). Intimate partner associated homicides occur when a victim—which may include law enforcement, friends, neighbors, relatives, or bystanders—is killed as a result of familial or intimate partner violence; intimate partner associated homicides of elders are included in this indicator. Out-of-state deaths resulting from fatal injuries inflicted in Virginia are also included.

The homicide rate (per 100,000) for elders aged 65 and older was calculated for each locality by dividing the number of elder homicides by a family member or caregiver in a locality by the total population of elders aged 65 and older in that locality and multiplying the result by 100,000. This report contains data for calendar years 2003 to 2008, presented as three-year rolling averages for 2005-2008 in order to address particularly high annual variation in familial elder homicide rates. Data is not ranked due to fluctuations in rates.

Data for 2008 are preliminary.

Limitations: The number of elder homicides by a family member or caregiver in a given year and locality is consistently small, which results in data which is highly variable year to year. Annual rates based on a small number of cases ($n < 20$) should be interpreted with caution.

These data were derived from a medicolegal death investigation rather than from a legal process. Therefore, these data include murder, manslaughter, and cases that may not have resulted in a legal finding of guilt for the alleged perpetrator. Due to this definition, the homicide data provided in this report may differ from homicide data from the State Police and the Virginia court system.

Elder Homicides Perpetrated by a Family Member or Caregiver

Arrests of Juveniles for Violent Sexual Offenses Committed against a Family Member

Source: These data were provided by the Incident Based Crime Reporting Repository System, Virginia State Police and obtained by special request to the Department of Criminal Justice Services. Data were processed by Debbie Roberts of the Department of Criminal Justice Services, Criminal Justice Research Center.

Definition: This indicator reflects the combined number of juvenile arrests made by law enforcement officials for violent sexual offenses perpetrated against a family member in a locality, per calendar year, as a rate within the population aged 10 to 17.

Data Detail: These data reflect the combined arrests for forcible rape, forcible sodomy, sexual assault with an object, forcible fondling, statutory rape, and incest by a juvenile family member reported by city, county, and town law enforcement agencies for each locality. All locality arrest counts include arrests reported by towns within the county, but do not include arrests made by other reporting agencies, such as college, university, airport, or capitol police.

The Incident Based Crime Reporting Repository System defines a family member as a boyfriend, girlfriend, child of boyfriend/girlfriend, homosexual relationship, parent, child, sibling, grandparent, grandchild, spouse, ex-spouse, common-law spouse, in-law, step-parent, step-sibling, step-child, and other family member, as reported by the victim (instances in which the relationship between victim and perpetrator is not identified are not included).

The arrest rate (per 1,000) was calculated for each locality by dividing the number of arrests of juveniles in a locality by the total population of youth aged 10 to 17 in that locality and multiplying the result by 1,000. This report contains data for calendar years 2004 to 2008.

Limitations: The number of arrests for familial violent sexual offenses by juveniles in a given year and locality is consistently

small, which results in data that are highly variable year to year. Annual rates based on a small number of cases ($n < 20$) should be interpreted with caution.

Some localities have occasionally had problems reporting complete crime and/or arrest data to the Incident Based Crime Reporting Repository System. Localities with past reporting problems—including technical difficulties and lack of resources among local agencies—are as follows:

2004: Arlington County, Caroline County, Floyd County, Greensville County, Halifax County, King George County, Powhatan County, Shenandoah County, Spotsylvania County, Alexandria City, Buena Vista City, Emporia City, Fairfax City, Salem City, Staunton City, Williamsburg City

2005: Alleghany County, James City County, Roanoke County, Fairfax City, Manassas Park City, Staunton City

2006: Augusta County, Prince Edward County, Roanoke County, Southampton County, Stafford County, Buena Vista City, Falls Church City, Norfolk City, Petersburg City, Richmond City

2007: Augusta County, Lunenburg County, Prince Edward County, Shenandoah County, Southampton County, Norfolk City

2008: Goochland County, Lunenburg County, Madison County, Middlesex County, Fairfax City

Since data are not included when the relationship between victim and perpetrator is not identified, these data underestimate the actual incidence of familial violent sexual offenses by juveniles reported to law enforcement.

Arrests of Juveniles for Violent Sexual Offenses Committed against a Family Member

Arrests of Adults for Violent Sexual Offenses Committed against a Family Member

Source: These data were provided by the Incident Based Crime Reporting Repository System, Virginia State Police and obtained by special request to the Department of Criminal Justice Services. Data were processed by Debbie Roberts of the Department of Criminal Justice Services, Criminal Justice Research Center.

Definition: This indicator reflects the combined number of adult arrests made by law enforcement officials for violent sexual offenses perpetrated against a family member in a locality, per calendar year, as a rate within the population aged 18 and older.

Data Detail: These data reflect the combined arrests for forcible rape, forcible sodomy, sexual assault with an object, forcible fondling, statutory rape, and incest by an adult family member reported by city, county, and town law enforcement agencies for each locality. All locality arrest counts include arrests reported by towns within the county, but do not include arrests made by other reporting agencies, such as college, university, airport, or capitol police.

The Incident Based Crime Reporting Repository System defines a family member as a boyfriend, girlfriend, child of boyfriend/girlfriend, homosexual relationship, parent, child, sibling, grandparent, grandchild, spouse, ex-spouse, common-law spouse, in-law, step-parent, step-sibling, step-child, and other family member, as reported by the victim (instances in which the relationship between victim and perpetrator is not identified are not included).

The arrest rate (per 1,000) was calculated for each locality by dividing the number of arrests of adults in a locality by the total population of adults aged 18 or older in that locality and multiplying the result by 1,000. This report contains data for calendar years 2004 to 2008.

Limitations: The number of arrests for familial violent sexual offenses by adults in a given year and locality is consistently

small, which results in data that are highly variable year to year. Annual rates based on a small number of cases ($n < 20$) should be interpreted with caution.

Some localities have occasionally had problems reporting complete crime and/or arrest data to the Incident Based Crime Reporting Repository System. Localities with past reporting problems—including technical difficulties and lack of resources among local agencies—are as follows:

2004: Arlington County, Caroline County, Floyd County, Greensville County, Halifax County, King George County, Powhatan County, Shenandoah County, Spotsylvania County, Alexandria City, Buena Vista City, Emporia City, Fairfax City, Salem City, Staunton City, Williamsburg City

2005: Alleghany County, James City County, Roanoke County, Fairfax City, Manassas Park City, Staunton City

2006: Augusta County, Prince Edward County, Roanoke County, Southampton County, Stafford County, Buena Vista City, Falls Church City, Norfolk City, Petersburg City, Richmond City

2007: Augusta County, Lunenburg County, Prince Edward County, Shenandoah County, Southampton County, Norfolk City

2008: Goochland County, Lunenburg County, Madison County, Middlesex County, Fairfax City

Since data are not included when the relationship between victim and perpetrator is not identified, these data underestimate the actual incidence of familial violent sexual offenses by adults reported to law enforcement.

Arrests of Adults for Violent Sexual Offenses Committed against a Family Member

Arrests of Juveniles for Non-sexual Violent Offenses against a Family Member

Source: These data were provided by the Incident Based Crime Reporting Repository System, Virginia State Police and obtained by special request to the Department of Criminal Justice Services. Data were processed by Debbie Roberts of the Department of Criminal Justice Services, Criminal Justice Research Center.

Definition: This indicator reflects the combined number of juvenile arrests made by law enforcement officials for non-sexual violent offenses perpetrated against a family member in a locality, per calendar year, as a rate within the population aged 10 to 17.

Data Detail: These data reflect the combined arrests for kidnapping/abduction, robbery, aggravated assault, simple assault, and intimidation by a juvenile family member reported by city, county, and town law enforcement agencies for each locality. All locality arrest counts include arrests reported by towns within the county, but do not include arrests made by other reporting agencies, such as college, university, airport, or capitol police. Homicide and manslaughter are not included in this indicator, as those data are reflected in other indicators.

The Incident Based Crime Reporting Repository System defines a family member as a boyfriend, girlfriend, child of boyfriend/girlfriend, homosexual relationship, parent, child, sibling, grandparent, grandchild, spouse, ex-spouse, common-law spouse, in-law, step-parent, step-sibling, step-child, and other family member, as reported by the victim (instances in which the relationship between victim and perpetrator is not identified are not included).

The arrest rate (per 1,000) was calculated for each locality by dividing the number of arrests of juveniles in a locality by the total population of youth aged 10 to 17 in that locality and multiplying the result by 1,000. This report contains data for calendar years 2004 to 2008.

Limitations: Some localities have occasionally had problems reporting complete crime and/or arrest data to the Incident Based Crime Reporting Repository System. Localities with past reporting problems—including technical difficulties and lack of resources among local agencies—are as follows:

2004: Arlington County, Caroline County, Floyd County, Greensville County, Halifax County, King George County, Powhatan County, Shenandoah County, Spotsylvania County, Alexandria City, Buena Vista City, Emporia City, Fairfax City, Salem City, Staunton City, Williamsburg City

2005: Alleghany County, James City County, Roanoke County, Fairfax City, Manassas Park City, Staunton City

2006: Augusta County, Prince Edward County, Roanoke County, Southampton County, Stafford County, Buena Vista City, Falls Church City, Norfolk City, Petersburg City, Richmond City

2007: Augusta County, Lunenburg County, Prince Edward County, Shenandoah County, Southampton County, Norfolk City

2008: Goochland County, Lunenburg County, Madison County, Middlesex County, Fairfax City

Since data are not included when the relationship between victim and perpetrator is not identified, these data underestimate the actual incidence of familial non-sexual violent offenses by juveniles reported to law enforcement.

Arrests of Juveniles for Non-sexual Violent Offenses against a Family Member

Arrests of Adults for Non-sexual Violent Offenses against a Family Member

Source: These data were provided by the Incident Based Crime Reporting Repository System, Virginia State Police and obtained by special request to the Department of Criminal Justice Services. Data were processed by Debbie Roberts of the Department of Criminal Justice Services, Criminal Justice Research Center.

Definition: This indicator reflects the combined number of adult arrests made by law enforcement officials for non-sexual violent offenses perpetrated against a family member in a locality, per calendar year, as a rate within the population aged 18 and older.

Data Detail: These data reflect the combined arrests for kidnapping/abduction, robbery, aggravated assault, simple assault, and intimidation by an adult family member reported by city, county, and town law enforcement agencies for each locality. All locality arrest counts include arrests reported by towns within the county, but do not include arrests made by other reporting agencies, such as college, university, airport, or capitol police. Homicide and manslaughter are not included in this indicator, as those data are reflected in other indicators.

The Incident Based Crime Reporting Repository System defines a family member as a boyfriend, girlfriend, child of boyfriend/girlfriend, homosexual relationship, parent, child, sibling, grandparent, grandchild, spouse, ex-spouse, common-law spouse, in-law, step-parent, step-sibling, step-child, and other family member, as reported by the victim (instances in which the relationship between victim and perpetrator is not identified are not included).

The arrest rate (per 1,000) was calculated for each locality by dividing the number of arrests of adults in a locality by the total population of adults aged 18 or older in that locality and multiplying the result by 1,000. This report contains data for calendar years 2004 to 2008.

Limitations: Some localities have occasionally had problems reporting complete crime and/or arrest data to the Incident Based Crime Reporting Repository System. Localities with past reporting problems—including technical difficulties and lack of resources among local agencies—are as follows:

2004: Arlington County, Caroline County, Floyd County, Greensville County, Halifax County, King George County, Powhatan County, Shenandoah County, Spotsylvania County, Alexandria City, Buena Vista City, Emporia City, Fairfax City, Salem City, Staunton City, Williamsburg City

2005: Alleghany County, James City County, Roanoke County, Fairfax City, Manassas Park City, Staunton City

2006: Augusta County, Prince Edward County, Roanoke County, Southampton County, Stafford County, Buena Vista City, Falls Church City, Norfolk City, Petersburg City, Richmond City

2007: Augusta County, Lunenburg County, Prince Edward County, Shenandoah County, Southampton County, Norfolk City

2008: Goochland County, Lunenburg County, Madison County, Middlesex County, Fairfax City

Since data are not included when the relationship between victim and perpetrator is not identified, these data underestimate the actual incidence of non-sexual violent offenses against family members reported to law enforcement.

Arrests of Adults for Non-sexual Violent Offenses against a Family Member

Emergency Protective Orders Issued against a Family Member

Source: These data were provided by the Virginia Supreme Court, Office of the Executive Secretary and obtained by special request in October 2009 and January 2010 to Chris Wade, Senior Management Information Analyst.

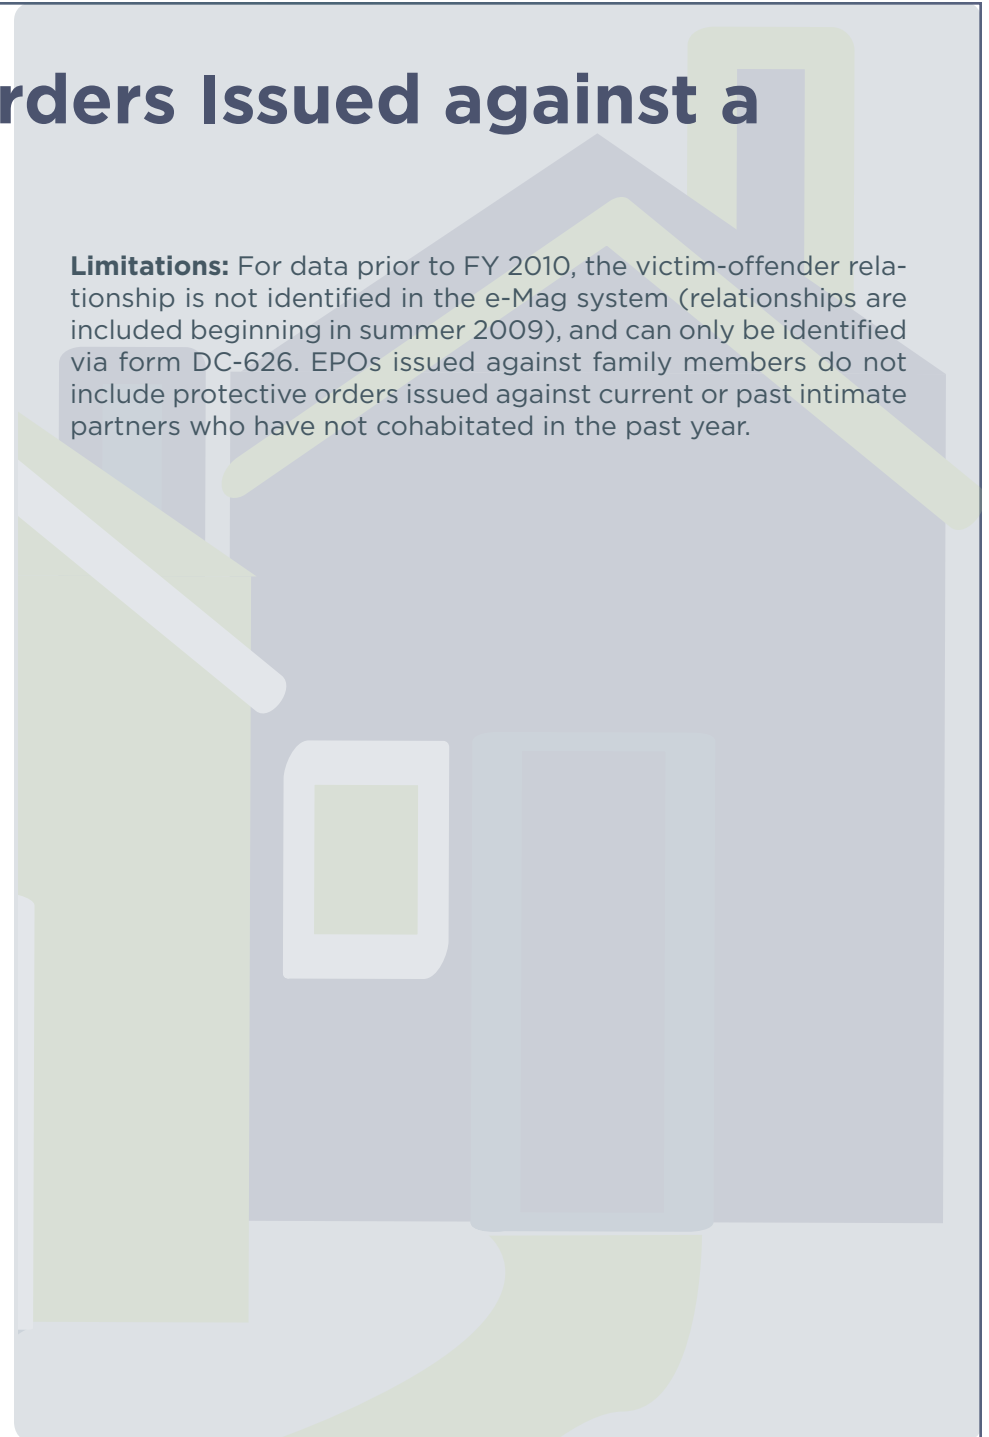

Definition: This indicator reflects the number of emergency protective orders issued against a family member in a locality, per calendar year, as a rate within the population aged 18 and older.

Data Detail: These data reflect the number of emergency protective orders (EPOs) issued by Virginia judges and magistrates for abuse by a family member. An EPO is a 72-hour legal restraint issued to protect one person from abuse by another, and it is the first step toward a permanent, two-year legal restraint. Data on EPOs are from the Virginia e-Mag system, a case management system for magistrate courts, and include those EPOs issued by a magistrate after issuance of form DC-626, EPOs for family abuse. In all cases, an EPO is issued at the request of the alleged victim. Only adults can request an emergency protective order; children must seek a child protective order.

Family members are defined by the Code of Virginia § 16.1-228 as a spouse or ex-spouse, parents, children, step-parents, step-children, siblings, grandparents, grandchildren, and persons who have a child in common (whether or not they live together), in-laws if they live in the same house and cohabitants or those who have cohabited in the past year and their children. These relationships are included in this indicator.

The rate (per 1,000) was calculated for each locality and the Commonwealth of Virginia by dividing the number of EPOs issued by the total adult population aged 18 and older in each locality and multiplying the result by 1,000. This report contains data for calendar years 2006 to 2008.

Limitations: For data prior to FY 2010, the victim-offender relationship is not identified in the e-Mag system (relationships are included beginning in summer 2009), and can only be identified via form DC-626. EPOs issued against family members do not include protective orders issued against current or past intimate partners who have not cohabitated in the past year.

Emergency Protective Orders Issued against a Family Member

Arrests for Violation of a Protective Order

Source: These data were provided by the Virginia State Police, Central Criminal Records Exchange and obtained by special request to William J. Reed, Jr., of the Criminal Justice Information Services Division of the Virginia State Police in November 2009 and January 2010.

Definition: This indicator reflects the number of arrests made for violation of an active protective order, in a locality, per calendar year as a rate within the population aged 18 and older.

Data Detail: These data reflect the number of arrests made for violation of an active protective order, which is legal restraint limiting an individual from interaction with another person and/or premises. Protective orders can also prohibit criminal offenses as outlined in § 19.2-152.10(A)1 of the Code of Virginia, and other conditions as the judge or magistrate deems necessary as outlined in § 19.2-152.8(B)2 or § 19.2-152.9(A)3 of the Code of Virginia. All types of protective orders—emergency, preliminary, and final—are captured in the data.

The rate (per 1,000) was calculated for each locality and the Commonwealth of Virginia by dividing the number of arrests by the total adult population (aged 18 and older) in each locality and multiplying the result by 1,000. This report contains data for calendar years 2004 to 2008.

Limitations: This indicator is not specific to family relationships because the Central Criminal Records Exchange does not retain information associated with relationships.

Arrests for Violation of a Protective Order

Domestic Violence Shelter Locations

Source: These data were provided by the Virginia Sexual and Domestic Violence Action Alliance, with guidance on current shelter names and accreditation status provided by Nancy Fowler, Program Manager at Virginia Department of Social Services.

Definition: This indicator reflects the distribution across the Commonwealth of Virginia of domestic violence shelters that provide overnight shelter, as captured by the Virginia Sexual and Domestic Violence Action Alliance's record of accredited shelters.

Data Detail: This indicator is a mapping of all domestic violence shelters in Virginia that provide victims of domestic violence with emergency shelter, whether in a formal shelter or by arranging for emergency housing in motels or other locations. A dot is placed on the map for each shelter location to indicate the distribution of such resources across the state. No weighting for population is applied.

Limitations: Shelters are included if they were on the lists mentioned above. However, there are non-profit and faith-based shelters that are not counted. Only VSDVAA-accredited shelters are included in this map. Unaccredited shelters—primarily non-profit and faith-based shelters—are not included in this map; therefore, this map underestimates the number of centers providing overnight shelter. The circles with numbers, 1-40, represent those domestic violence shelters funded by the Virginia Department of Housing and Community Development's (DHCD) State Shelter Grants only. The remaining circles without numbers represent an additional twelve VSDVAA-accredited domestic violence shelters which are not funded by DHCD.

Domestic Violence Shelter Locations

Domestic Violence Shelter Bed-nights Provided to Individuals

Source: These data were provided by the Virginia Department of Housing and Community Development (DHCD) and obtained by special request to Nicole Poulin, Program Manager, in fall 2009. Data were submitted by emergency shelter providers that identify their target population as victims of domestic violence and receive State Shelter Grant (SSG) funding. The data were compiled by Nicole Poulin and Linda Warner, Housing Program Administrator.

Definition: This indicator reflects the number of domestic violence shelter bed-nights provided to adults and children, by shelter, by state fiscal year.

Data Detail: These data reflect the number of bed-nights provided to adults and children by domestic violence shelters that receive funding from DHCD. “Bed-nights” means the number of beds in use multiplied by the number of nights used (e.g., a shelter with 10 beds that had 9 in use each night over the course of a week provided 63 bed-nights that week). All shelters receiving funding through DHCD must submit quarterly information on the number of persons served and the number and type of services provided to them. DHCD has a requirement that emergency shelters for victims of domestic violence that receive State Shelter Grants (SSG) funds may grant priority to domestic violence victims, but must provide services to women who are homeless due to other causes when space is available. Thus, some shelters provide services beyond domestic violence, such as shelter for evicted persons or the chronically homeless. All bed-nights provided by these organizations are counted in this indicator, as there is no way to distinguish between bed-nights provided due to domestic violence and those provided due to other reasons.

Limitations: Data on bed-nights provided are not available for all Virginia domestic violence shelters, and this indicator presents data for only the subset that receives funding from DHCD. There are non-profit and faith-based shelters that are not counted. This indicator undercounts the total number of bed-nights provided in the state, due to limited data availability.

Individuals Denied Shelter Due to Lack of Space

Source: These data were provided by the Virginia Department of Housing and Community Development (DHCD) and obtained by special request to Nicole Poulin, Program Manager, in fall 2009. Data were submitted by emergency shelter providers that identify their target population as victims of domestic violence and receive State Shelter Grant (SSG) funding. The data were compiled by Nicole Poulin and Linda Warner, Housing Program Administrator.

Definition: This indicator reflects the number of domestic violence shelter bed-nights provided to adults and children, by shelter, by state fiscal year.

Data Detail: These data reflect the number of individuals turned away from domestic violence shelters each year due to lack of bed space at domestic violence shelters that receive funding from DHCD. All shelters receiving funding through DHCD must submit quarterly information on the number of persons served and the number and type of services provided to them. DHCD has a requirement that emergency shelters for victims of domestic violence that receive State Shelter Grant (SSG) funds may grant priority to domestic violence victims, but must provide services to women who are homeless due to other causes when space is available. Thus, some shelters provide services beyond domestic violence, such as shelter for evicted persons or the chronically homeless. All individuals turned away from these organizations due to lack of bed space are counted in this indicator.

Limitations: Data on individuals denied shelter due to lack of space are not available for all Virginia domestic violence shelters, and this indicator presents data for only that subset that receives funding from DHCD. There are non-profit and faith-based shelters that are not counted. This indicator may undercount the total number of individuals denied shelter in the state, due to limited data availability.

Domestic Violence Shelter Bed-nights Provided and Denied to Individuals

Number of Homeless Adults Who Report Having Experienced Domestic Violence

Source: These data were provided by the Homelessness Resource Exchange, U.S. Department of Housing and Urban Development and Virginia Department of Housing and Community Development (DHCD). Data for 2009 were obtained by special request in January 2010 to Matt Leslie, DHCD Housing Policy Analyst.

Definition: This indicator reflects the number of homeless adults who reported they were victims of domestic violence in a Continuum of Care, per calendar year, as gathered by the point-in-time counts described below.

Data Detail: These data reflect point-in-time counts of sheltered and unsheltered individuals performed by Virginia Continuums of Care in the last week of January each year. Continuums of Care are regional planning groups that organize and deliver housing and services that meet the specific needs of homeless individuals and families as they move toward stable housing and maximum self-sufficiency. Continuums of Care are funded by the U.S. Department of Housing and Urban Development (HUD) and encompass one or more Virginia planning districts. HUD requires that all Continuums biannually report point-in-time counts of people experiencing homelessness to inform local, regional and national programs and planning. The Virginia DHCD organizes the annual point-in-time counts for the Balance of the State Continuum (a region where there is not an existing Continuum of Care planning group) in conjunction with local offices.

Point-in-time survey data collection methods are usually developed by the local Continuum and then implemented by area homeless shelters, transitional housing programs, and other service providers. They often vary within and between Continuums of Care based on available resources and locality characteristics. Data on homeless persons having experienced domestic violence are collected through self-report at the time of the sur-

vey, or the locality produces estimates based on knowledge of the homeless population. Experience of domestic violence may include violence before and/or during the period of homelessness.

The number of homeless adults who report having experienced domestic violence and the total number of homeless persons is presented, by Continuum of Care.

Limitations: Point-in-time counts are administered locally and methods vary; for example, some localities canvass an area and administer surveys while other localities rely on police counts. The point-in-time counts conducted in areas that do not have shelters rely heavily on counts of unsheltered homeless and are inherently less reliable than counts that include sheltered individuals. Point-in-time counts are gathered on a single night and represent a snapshot rather than an annual average. Because the U.S. Department of Housing and Urban Development requires that counts be conducted every two years, not every Continuum of Care provides data for every calendar year.

Estimates of subpopulations of homeless, including those experiencing domestic violence, are typically limited by a small number of observations ($n < 20$). In localities where homeless individuals are not widely surveyed or are estimated, the precision of estimates for subpopulations will not be strong. These data should be interpreted with caution.

No data on homelessness are available for Highland County or Bath County.
